

# LG Series Low Capacity Force Gauge

The CHATILLON® LG Series mechanical force gauge is ideal for a wide range of force testing applications. Based on our popular DPP Series force gauge, the LG Series features a larger, 2.25-inch dial for improved resolution and readability, peak hold button, ergonomic shape and improved accuracy of  $\pm 0.5\%$  of full scale. The LG gauge is an excellent, economical solution for tensile or compression testing.

The durable, plastic housing fits naturally in the hand for a comfortable and firm grip even at maximum loads. Gauges may be mounted to a test stand for even greater control and consistent results in repetitive testing applications. Easy to read concentric dial measures clockwise only. Dial rotates 360-degrees for taring. A peak hold button captures peak readings and can be easily and quickly returned to zero. A mechanical overload feature protects the gauge from damage. Available in lbf, kgf or N units of measure. LG Series gauges come complete with protective carrying case and a set of stainless steel attachments. A Certificate of Calibration with Data is supplied standard.

## FEATURES

- Easy to Use, Durable Construction
- Tensile or Compression Testing
- Intrinsically Safe
- Capacities Up to 100 lbs (25 kg, 250 N)
- Push or Pull Operations
- Tare Ring
- Peak Capture
- NIST Calibration with Data
