

INFINITE

From the birthplace of portable metrology - ROMER CimCore's **NEW INFINITE** CMM redefines portability. The INFINITE arm, engineered and manufactured by the inventor and world's leading innovator in portable metrology, sets new industry standards.

Wi-Fi

INFINITE arms provide INFINITE portability on the shop floor or in the field as they are equipped with integrated Wi-Fi 8.02.11b wireless communication and Li-ION battery power.

Other **NEW** features include:

- a redesigned, integrated low profile Zero-G counterbalance
- an integrated USB digital camera
- DOCS Lite (Digital Overlay Camera System) software for basic prismatic measuring
- a 7 axis model is available for real-time laser scanning inspection and reverse engineering

The INFINITE arm is available in measuring ranges of: 4, 6, 8, 9, 10, and 12 feet.

Please see the flip side of this document for more features.
